Sex male | Date of birth 20/05/1982 | Nationality Greek | Military service completed

WORK EXPERIENCE

29/9/2022 - Present

R&D engineer (E.TE.Π)/Researcher

National Technical University of Athens (NTUA), Athens, Greece (www.ntua.gr)

- Manager of the Microscopy Lab (SEM) and XRD lab of the School of Physics, NTUA
- Researcher in national and EU funded research-projects.

1/4/2021 – 31/7/2023

Scientific director of the “AcID” research project

NEUROPUBLIC S.A. (<https://www.neuropublic.gr/>)

- Scientific director for the «Active ingredient detector (AcID)» research project in the context of the “Research-Create-Innovate” action
- [Research/Project-management](#)

September 2016 – October 2022

Adjunct Lecturer

University of West Attica; Athens, Greece. (<https://www.uniwa.gr/>)

- Teaching of 3 undergraduate courses (Nanoelectronics, nanotechnology, biomaterials & tissue engineering) in the department of Biomedical Engineering and Electrical Engineering.

[Research/Teaching](#)

September 2014 - Present

Post-doctoral researcher

National technical University of Athens; Athens, Greece (<http://www.ntua.gr/>)

- Materials research/development, nano-materials, bio-materials, sensors, material physics, electronics. Development of thin/thick films using DC/RF sputtering and the ALD technique.
- Lecturing in undergraduate & postgraduate courses, Lab instructor/teaching (thin film processing & characterization, clean room techniques, nanomaterials)

[Research/Teaching](#)

March 2016 – June 2022

Research technology development & innovation Consultant

Atlantis Consulting S.A. (<http://www.atlantisresearch.gr/>)

- Part-time consultant/Research affiliate. Writing/submission of research proposals for European/national calls.

[Consulting](#)

September 2014 - June 2015

Project-manager

N.C.S.R. Demokritos (<http://www.demokritos.gr/>)

- Scientific input and game development of a “serious-game”, in the framework of the EU funded project “STIMULATE - Stimulating the Public Attitude Towards Advanced Materials”, which highlights and popularizes the importance of advanced materials.

[Project management/research](#)

March 2009 - October 2013

Ph.D. candidate/researcher

National technical University of Athens; Athens, Greece (<http://www.ntua.gr/>)

- Main researcher of a project funded by the E.U. and National funds, in the frame of the “Heraclitus II actions”, for 36 months. Development of nano-materials/thin films for sensing applications.
- Lab instructor in the school of Applied Mathematics & Physics of the N.T.U.A, for the undergraduate courses: Experimental Physics I & II.

Research

EDUCATION AND TRAINING

March 2009 - October 2013	Doctor of Philosophy (Ph.D.)	EQF 8
	National technical University of Athens; Athens, Greece.	
	<ul style="list-style-type: none"> ▪ Research in materials physics, nanotechnology, microelectronics & sensor technology; material development via DC/RF magnetron sputtering, material characterization. 	
2006 - 2008	Postgraduate course “Microsystems & nanodevices” (M.Sc.)	EQF 7
	National technical University of Athens; Athens, Greece.	
	<ul style="list-style-type: none"> ▪ M.Sc. program in the field of material physics, microsystems & nanodevices; laboratory experience in microelectronic processes, material development & characterization. 	
2000 - January 2007	School of applied Mathematics and Physics (Diploma)	EQF 6
	National technical University of Athens; Athens, Greece.	
	<ul style="list-style-type: none"> ▪ Five year diploma degree. Specialized in Applied Physics and particularly in: Optoelectronics and Material Physics. 	
1997-2000	High school degree.	EQF 4
	The Italian school of Athens; Athens, Greece.	

DISTINCTIONS/AWARDS
ACHIEVEMENTS

- **Outstanding publication/presentation award**, Eurosensors 2012 Int. Scientific Conference for the paper: Platinum nanoparticle chemical Sensor on Polyimide Substrate
- **“Thomaideio award”**, awarded by the National Technical University of Athens, for exceptional publications in journals **for the years 2012 & 2013**.
- **“Heraclitus II” PhD scholarship** (ranked in the first ten, among 240 scholarship proposals within NTUA, 2010). E.U. and NSRF funded scholarship.
- **“IKY-Siemens 2014-2016” post-doc scholarship**, awarded after the selection of Dr. Skotadis’ research proposal. The scholarship is funded by the National State Scholarship Foundation (IKY) and Siemens.
- **“IKY-Siemens 2016-2017” post-doc scholarship**, awarded after the selection of Dr. Skotadis’ research proposal. The scholarship is funded by the National State Scholarship Foundation (IKY) and Siemens.
- **Guest editor in «Biosensors» journal**, for the special issue: «Novel Concepts in Aptamer Selection, Modification and Integration into Sensing Platforms»
- **Scientific Director/Principal investigator for a Research Program (Active Ingredient Detector (AcID)) Research program**, under the call “RESEARCH-CREATE-INNOVATE” (project code: T2EDK-01949).

PERSONAL SKILLS

Mother tongue(s) Greek

Other languages

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken interaction	Spoken production	
English	Proficient	Proficient	Proficient	Proficient	Proficient
	Proficiency diploma: University of Cambridge & University of Michigan (C1)				
Italian	Proficient	Proficient	Proficient	Proficient	Proficient

Diploma di Lingua Italiana (istituto Italiano di cultura in Atene) (C1), Graduated from the Italian school of Athens

Communication skills Excellent communication skills, professor/tutor in undergraduate and postgraduate courses in the NTUA and UniWA. Presentations & talks in international scientific conferences, workshops and business forums; dissemination of research via reports, publications and presentations. In the frame of the «Stimulate» project: organization of the evaluation process of the project from high school student groups.

Organisational / managerial skills Excellent organisational, managerial and leadership skills (coordination/management of multimember and interdisciplinary groups of scientists & students in the frame of EU funded research programs). Management/coordination of a scientific group (a team of 7 people) for the EU funded project «Stimulate». Preparation/writing of research proposals and deliverables. Mentoring: supervisor of undergraduate and postgraduate thesis.

Job-related skills Autonomous teaching of 3 undergraduate courses. Lab instructor for 4 years in the school of Applied Mathematics & Physics of the N.T.U.A, for the undergraduate courses: Experimental Physics I & II. Lab instructor/Lecturer in undergraduate as well as postgraduate experimental courses at N.T.U.A.'s M.Sc. program: Microsystems & Nanodevices. Research in the field of experimental/laboratory Physics, material science/nanotechnology and microelectronics technology. Material characterization/metrology. Data analysis/processing, procurement, building-up and maintenance of lab equipment. Development of new lab equipment specifically designed for experiments. Experimental data analysis. Analytical thinking, working under strict deadlines, demanding and competitive conditions. Proposal writing, drafting/writing/reviewing of scientific articles.

Technical skills

Production/synthesis of thin films, High vacuum deposition systems: physical vapour deposition (PVD) of thin film materials (DC, RF magnetron sputtering). Atomic layer deposition (ALD) of thin film materials, Ink-jet printing, thermal and e-gun evaporation of metals. Standard microelectronic processing, clean room techniques, chemical processing, e-beam lithography, optical lithography. Structural, surface and electrical characterization of materials: Scanning Electron Microscopy (SEM), Scanning Probe Microscopy (AFM), profilometer, electrical characterization (I-V, C-V, low temperature I-V measurements), XRD, TEM, Laboratory research.

Digital competence

SELF-ASSESSMENT				
Information processing	Communication	Content creation	Safety	Problem solving
Proficient user	Proficient user	Proficient user	Proficient user	Proficient user

C++, Fortran, Java, Python, Matlab, LabVIEW, Pascal, UNIX, Microsoft Office suite, Origin, Photoshop, CAD.

Other skills Classic & electric guitar, member of the undergraduate and postgraduate student council (NTUA).

Driving licence B

Presentations/entrepreneurial activities:

- **Startupbootcamp smart materials, open Pitch days 2015.** Participation and 3 min pitch presentation of an advanced material application (sensors for tactile surfaces) in startupbootcamp's open pitch days, so as to participate in a business accelerator program. (<http://www.startupbootcamp.org/welcome.html>)

Seminars:

- **International workshop MINASENS** of the N.C.S.R. Demokritos, dealing with technological systems for health, food industry and environmental applications.
- **2010 & 2011 summer schools** for microelectronics and nanotechnology of the N.C.S.R. Demokritos.

Work in research programs:

- **EU research program "Stimulate"**. Outreach program for the information of the general public on the results of scientific research in the field of materials/microelectronics/nanotechnology and its effect on European societies.
- **EU research program "Lab on Chip"**. Development of a biological sensor incorporating elements of nanotechnology and implemented in a Lab on Chip application
- **NSRF Program "DIAMOND"** in the framework of the RTDI State Aid Action "**Research-create-innovate**". Development of a portable Lab On Chip application for the rapid detection of diseases, based on micro-sensors of advanced materials.
- **Privately funded research program "Sensor fabrication and characterization"** (NTUA, Neupublic). Fabrication of nanomaterial based chemical sensors for the detection of environmental pollutants (pesticides) in the gas phase.
- **2 post-doctoral research programs** funded by the **IKY Fellowships of Excellence for Postgraduate Studies in Greece – Siemens Program**.
- **NSRF program "Development of low-dimensional material-based biosensor for DNA detection"**, under the call for proposals "_Researchers' support with an emphasis on young researchers- 2nd Cycle_". The project is co-financed by Greece and the European Union (European Social Fund- ESF). Development of a novel Bio-FET biosensor, by employing 2D materials (MoS₂).
- **Scientific Director/Principal investigator for a Research Program «Active Ingredient Detector (AcID)» Research program**, co-financed by the European Regional Development Fund of the European Union and Greek national funds through the Operational Program Competitiveness, Entrepreneurship and Innovation, under the call "**RESEARCH-CREATE-INNOVATE**" (project code: T2EDK-01949). Development of a chemical/gas sensing-array for the identification of commercial pesticides in the greenhouse; the array will be also integrated inside a remote smart-farming tool.
- **NSRF program «MICSYS: Microfluidic based system for the detection of water pollution»**, in the framework of the RTDI State Aid Action "**Research-create-innovate**". Development of a novel biosensor for the detection of heavy metal ions in water.
- **NSRF program «Ship Predictive Intelligent Sensor Model Integrated Digitally: sPRISMoid»** (TAEΔK 05405) in the framework of the RTDI State Aid Action "**Research-create-innovate**" implemented under the National recovery and resilience «**Greece 2.0**». Development of novel nanomaterial based sensors for detecting critical parameters in ship drive-shafts.
- **NSRF program «MIKROVIOFARM: Development of a Biosensors' Microsystem for the Selective Detection of Pesticides»** (ATTP4-0325463). Development of electrochemical biosensors for detecting pesticides via portable, on-site diagnostic systems (Lab on chip systems).
